

Domaille Engineering LLC

## DOMAILLE UNIVERSAL CURE OVEN

The Universal Cure Oven is designed to maximize productivity when curing epoxy on single and multi-fibre connectors.

It utilises a modular carrier tray for efficient assembly and loading of up to 24 MT connectors or 48 single-fibre connectors at a time.

The Universal Cure Oven also has the most consistent thermal pattern in the industry for superior cure results.

### FEATURES

- Specifically designed for MT/ MPO connector epoxy curing with the tightest thermal pattern in the industry.
- Will cure connectors in either horizontal or vertical position.
- Utilises carrier trays for easy loading and maximum productivity.
- May be configured to hold almost any style of connector.
- Increases productivity and consistently achieves superior yield results.
