CRIMPLOK TOOL KIT

Crimplok connectors are an epoxyless, easy to terminate, connector system that provides the performance of an epoxy type connector. They provide the ideal solution for restoration and repair or for fibre to the desk installations. Crimplok connectors are available in ST and SC style for either multimode or singlemode fibres.

Crimplok connectors offer the following benefits:-

- Saves time on installation
- Provide rugged reliable performance to EIA/TIA568A
- Easy installation with minimum tooling
- No epoxy, so no messy clean up or cure time delay
