FERRULE MATE

ferrule
™ mate

The Ferrule Mate is a unique product for cleaning ferrule end faces inside and outside of patch panels and enclosures. The cleaning cloth at the tip can reach the ferrule end face inside an adaptor panel; the special protection cap can hold a ferrule or connector and allow cleaning the ferrule end face without adaptors. The Ferrule Mate has an adjustable tip for angle mounted adaptors. This tool can be used for over 300 cleaning wipes.

Cleaning is about both fibre surfaces - the patchcord on the outside of the panel and the connector on the inside of the panel.

Dust cap to keep cleaning surface clean

Cap removes for inserting cleaner into adaptors

Ferrule Mates

| Order Code | Description |
|------------|--|
| SFM-125 | Ferrule Mate for 1.25mm ferrules (LC and MU) |
| SFM-250 | Ferrule Mate for 2.5mm ferrules (ST, SC, FC etc) |

Flip open cap for inserting connectors for cleaning

Adjustable tip for angled adaptor cleaning

When the tool is activated, fresh cleaning material is pulled round the head which in turn rotates, effectively cleaning the optical fibre, either in an adaptor, or on the end of a patch cord.
