Tech Optics Ltd

Distributor of Fibre Optic Products

MTP/MPO ARRAY FIBRE REEL CLEANER

The MTP I.B.C. (In Bulkhead Cleaner) is the first dry cloth cleaner specifically designed to clean the MTP/MPO connectors while inside of an adapter, face-plate or bulkhead. The unique design enables cleaning of either male (with pins) or female (without pins) MT ferrules, single mode APC or multimode. This is an essential tool for networking equipment, such as switches and routers.

This Cleaning Tool is a disposable item; replacement tapes are NOT available

- Cloth cleaning tip of MPO Reel Cleaner
- Effective cleaner for male or female MTP/MPO connectors
- Over 400 cleanings per unit
- Cleaning cloth is washed and debris free
- Adapter supplied for cleaning unmated MTP/MPO's
- Adapter cap doubles as dust protection
- Compliant with FOCIS 5-Type MPO interface
- Effective cleaning on dust and oil
- Effective cleaning solution for parallel optics transceivers

Tech Optics stocks the replacement tapes for the "older" style Cletopt (with the lever on the side to move the tape on). These tapes are ordered under part number 14100700

Order Code 7104-MTP

Cleaning 'behind the wall' with the Reel Cleaner inserted into an array adaptor.
