

## STICKLERS CLEANING KIT

The Sticklers® Fiber Optic Cleaning Kit has been engineered to help field techs clean fibre networks quickly, reliably and inexpensively. This kit puts the time-saving Sticklers® cleaners in a "go anywhere, clean anything" package, giving each tech all the tools they need to get the job done right.

The Kit contains cleaners, wipes and swabs. With room for extra supplies, inspection scopes, strippers, clamps or other tools, each kit can be customized for either cleaning bare fibre before fusion splicing, or for cleaning connectors end-faces, or both.

There's also a new, military-ready cleaning kit available. The contents are slightly different, to accommodate the MIL-C-38999 connectors and other military designs, but you still get 800+ cleanings per kit.

- Contains the Most Popular Items for Cleaning Fibre Optic Connectors and for Cleaning Before Splicing
- Delivers 800+ Perfectly Clean Connectors and/or Splices
- Bright Colour Makes It Easy to Locate, Harder to Leave Behind
- Easy-Open Zipper and Convenient Self-Sealing Pouches for Holding Tools, Meters or Extra Supplies
- Features the Unique Sticklers® Nonflammable TravelSAFE™ Cleaning Fluid
- Making Cleaning Easy, Consistent and Fast Will Reduce the Costs of Sustaining Your Fibre Network

### Kit Contents/Features

Heavy-duty, weather-resistant, soft-sided polyester bag with a zipper closure.

The bag is 9" wide x 5" deep x 5" tall (approx. 20cm x 12cm x 12cm).

Two cans of Sticklers® Fiber Optic Splice & Connector Cleaner, sufficient for more than 800 cleanings;

One "mini-tubs" of Sticklers® Benchtop CleanWipes™;

One Sticklers® CleanWipes™ 400 cleaning tool (not shown in the photo),

One packet of 25 Sticklers® CleanWipes™ Singles for use in harsh environments,

Three sleeves of Sticklers® S25 CleanStixx™ swabs

Two sleeves of S12 CleanStixx™ swabs (ten swabs per sleeve, for a total of 50 CleanStixx™ swabs) for cleaning inside alignment sleeves,

A high-intensity, heavy-duty LED inspection flashlight.

## STICKLERS CLEANING KIT

Key features of both types of cleaning kits:

- The zipper bag speedily opens and closes, making it easy to handle, even with just one hand. The bright colour makes it easy to find, even in dimly lit areas, down in manholes or buried in the back of a truck.
- The bag is the perfect size to hold enough supplies without being cumbersome or bulky. Generous side-pockets allow additional wipes, sticks and tools to be stored in the kit
- The Cleaning Kit features proprietary, non-flammable TravelSAFE™ solvents so the kits can be shipped, even by air, without extra fees for hazardous materials or extra paperwork
- A plastic window displays the owner's identification in case the kit is lost

The commercial cleaning kit is #MCC-FK03

The military-ready kit is #MCC-FK05
