

Background

Fibre Optic technology is one of the fastest growing industries in the UK powering the telecommunications revolution and being widely adopted in a wide range of applications. Tech Optics is a dynamic, successful and progressive fibre optic company, based in Tonbridge, Kent. We specialise in the manufacture of fibre optic assemblies, the distribution of test & inspection equipment and provision of training. Our success is based on customer service encompassing quality, flexibility, responsiveness and technological excellence.

In 2020 Tech Optics became part of the Hexatronic Group and is pursuing a strong growth strategy. As part of this expansion Tech Optics is looking to recruit a trainee Fibre Optic Technician to their highly capable team.

Role Description

This is an entry level production line role requiring excellent manual dexterity and attention to detail. The right candidate will have considerable scope for development within the company.

Reporting to our Production Lead you will receive training in fibre optic termination, optical testing and manufacturing best practice. No prior fibre optic experience is required.

Main responsibilities:

- Terminating Fibre Optic assemblies
- Polishing Fibre Optic connectors
- Inspection of fibre optic connectors and assemblies
- Optical testing of fibre optic assemblies
- Cover other departments including QC and warehouse as required

Key Skills and Experience

The successful candidate will have the following qualities and experience:-

- Manual Dexterity
- Attention to detail
- A flexible problem solving mentality
- Ability to follow works instructions
- Ability to work within a team
- Computer literate

This role is based at Tech Optics offices in Tonbridge, Kent.

If you are an enthusiastic, committed team player with the desire to learn and develop a career within a friendly, high performance, technology-based organisation please send your CV to:
