

## 1.1 Quality Policy

Tech Optics quality policy exists to support the Company's strategy to ensure sustained profitable growth through the production and supply of fibre optic products and services which consistently meet or exceed the expectations of its customers, while fully meeting all regulatory requirements and needs of interested parties.

To provide and maintain consistently high-quality products and services Tech Optics has implemented and maintains an effective ISO9001:2015 quality management system (QMS) that ensures appropriate communication, operational controls and a strong commitment to continuous improvement.

The entire Tech Optics team is committed to the diligent application and regularly reviews the QMS to ensure it's adequacy and close alignment with the Company strategy and to identify potential areas of improvement in order to always provide our customers with consistent, compliant products and services.

Company quality objectives are established by the Tech Optics team and reviewed, measured, communicated and monitored throughout the company.

All Company personnel are quality-committed and are responsible for operating within the terms of the QMS through which they are encouraged to identify areas where improvements can be made.
